

Utah Teapot

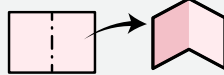

MARK GILLESPIE (2026)

NOTATION

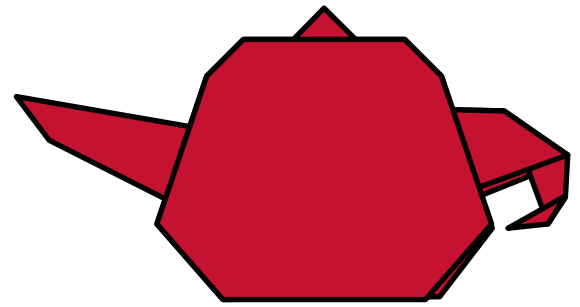

■ Colored side
□ Light side

Valley fold

Mountain fold

The Utah teapot is one of the foundational 3D models in the history of computer graphics, familiar to any graphics researcher.

Warning: most folds in this model have no guidelines. You just have to make them in the place that looks right.

- 1 *fold tip down*
- 2 *pinch at center*
- 3 *fold and unfold*
- 4 *reverse fold*
- 5 *fold tip down*
- 6 *fold tip back up*
- 7 *flip the model over
(if you're comfortable with sink folds, open sink the tip instead)*
- 8 *fold and unfold edges at an angle*
- 9 *reverse fold*
- 10 *repeat steps 8 and 9 behind*
- 11 *reverse fold tip up to form handle*
- 12 *repeat step 11 on left, modifying angle slightly to point spout up*
- 13 *thin spout and handle and repeat behind
squash fold inner layers as necessary to make everything lie flat*
- 14 *reverse fold tip of handle downwards*
- 15 *outside reverse fold tip of handle inwards*
- 16 *fold in bottom corners on front and back*
- 16 *fold in corners*
- 17 *completed teapot*
